

DEPARTMENT OF THE NAVY BOARD FOR CORRECTION OF NAVAL RECORDS 701 S. COURTHOUSE ROAD, SUITE 1001 ARLINGTON, VA 22204-2490

> Docket No. 3816-23 Ref: Signature Date

Dear Petitioner:

This is in reference to your application for correction of your naval record pursuant to Section 1552 of Title 10, United States Code. After careful and conscientious consideration of relevant portions of your naval record and your application, the Board for Correction of Naval Records (Board) found the evidence submitted insufficient to establish the existence of probable material error or injustice. Consequently, your application has been denied.

Because your application was submitted with new evidence not previously considered, the Board found it in the interest of justice to review your application. A three-member panel of the Board, sitting in executive session, considered your application on 10 January 2024. The names and votes of the panel members will be furnished upon request. Your allegations of error and injustice were reviewed in accordance with administrative regulations and procedures applicable to the proceedings of this Board. Documentary material considered by the Board consisted of your application together with all material submitted in support thereof, relevant portions of your naval record, and applicable statutes, regulations, and policies, to include the 25 August 2017 guidance from the Office of the Under Secretary of Defense for Personnel and Readiness (Kurta Memo), the 3 September 2014 guidance from the Secretary of Defense regarding discharge upgrade requests by Veterans claiming post-traumatic stress disorder (PTSD) (Hagel Memo), and the 25 July 2018 guidance from the Under Secretary of Defense for Personnel and Readiness regarding equity, injustice, or clemency determinations (Wilkie Memo). The Board also considered the advisory opinion (AO) furnished by a qualified mental health professional. Although you were afforded an opportunity to submit an AO rebuttal, you chose not to do so.

You previously applied to this Board for an upgrade to your characterization of service. You were denied relief on 4 April 2007 and 17 April 2015. The facts of your case remain substantially unchanged.

The Board carefully considered all potentially mitigating factors to determine whether the interests of justice warrant relief in your case in accordance with the Kurta, Hagel, and Wilkie Memos. These included, but were not limited to, your desire to upgrade your discharge character of service to "General or Higher" so that you are able to receive veterans' benefits. The Board

considered you contentions that: (1) you have many medical issues and need adequate treatment and healthcare coverage, (2) you are unable to receive benefits and insurance with an OTH character of service, (3) because of your medical history following your discharge, it has been very difficult to find anyone that would provide you treatment, (4) you will qualify for benefits when your discharge status is changed, (5) during your period of service at Camp Lejeune you were exposed to the contaminated water, and (6) upon enlisting into the Marine Corps you passed all of your physicals and medical exams with a clean bill of health. For purposes of clemency and equity consideration, the Board noted you provided a personal statement on your behalf but no supporting documentation describing post service accomplishments or advocacy letters.

As part of the Board's review, a qualified mental health professional reviewed your request and provided the Board with an AO on 15 November 2023. The AO noted in pertinent part:

There is no evidence that the Petitioner was diagnosed with a mental health condition or suffered from PTSD while in military service, or that he exhibited any psychological symptoms or behavioral changes indicative of a diagnosable mental health condition. He did not submit any medical evidence in support of his claim. His personal statement is not sufficiently detailed to establish clinical symptoms or provide a nexus with his misconduct. Additional records (e.g., post-service mental health records describing the Petitioner's diagnosis, symptoms, and their specific link to his misconduct) would aid in rendering an alternate opinion.

The AO concluded, "it is my considered clinical opinion there is insufficient evidence of a mental health condition that may be attributed to military service. There is insufficient evidence that his misconduct could be attributed to a mental health condition."

After thorough review, the Board concluded your potentially mitigating factors were insufficient to warrant relief. Specifically, the Board determined that your misconduct, as evidenced by your NJP and numerous administrative counselings, outweighed these mitigating factors. In making this finding, the Board considered the seriousness of your misconduct and concluded your misconduct showed a complete disregard for military authority and regulations. Further, the Board concurred with the AO that there is insufficient evidence of a mental health condition that may be attributed to military service, and there is insufficient evidence that your misconduct could be attributed to a mental health condition. As the AO explained, your personal statement is not sufficiently detailed to establish clinical symptoms or provide a nexus with your misconduct. There is no evidence that you were diagnosed with a mental health condition or suffered from PTSD while in military service, or that you exhibited any psychological symptoms or behavioral changes indicative of a diagnosable mental health condition. Therefore, the Board determined that the evidence of record did not demonstrate that you were not mentally responsible for your conduct or that you should otherwise not be held accountable for your actions. The Board noted that you were provided multiple opportunities to correct your deficiencies during your service; however, you continued to commit misconduct. Furthermore, the Board also noted that you did not provide any evidence, other than your statement, to substantiate your contentions. Finally, absent a material error or injustice, the Board declined to summarily upgrade a discharge solely for the purpose of facilitating veterans' benefits or

enhancing educational or employment opportunities. As a result, the Board concluded your conduct constituted a significant departure from that expected of a service member and continues to warrant an OTH characterization. Even in light of the even in light of the Kurta, Hagel, and Wilkie Memos and reviewing the record liberally and holistically, the Board did not find evidence of an error or injustice that warrants granting you the relief you requested or granting relief as a matter of clemency or equity. Accordingly, given the totality of the circumstances, the Board determined that your request does not merit relief.

Regarding your assertion concerning exposure to contaminated water at Camp Lejeune, Public Law 112-154, Honoring America's Veterans and Caring for Camp Lejeune Families Act of 2012, requires the Veterans Administration to provide health care to Veterans with one or more of 15 specified illnesses or conditions. You should contact the nearest office of the Department of Veterans Affairs (DVA) concerning your right to apply for benefits or appeal an earlier unfavorable determination.

You are entitled to have the Board reconsider its decision upon submission of new matters, which will require you to complete and submit a new DD Form 149. New matters are those not previously presented to or considered by the Board. In this regard, it is important to keep in mind that a presumption of regularity attaches to all official records. Consequently, when applying for a correction of an official naval record, the burden is on the applicant to demonstrate the existence of probable material error or injustice.

Sincerely,
