Dear █

This is in reference to your application for correction of your naval record pursuant to Section 1552 of Title 10, United States Code. After careful and conscientious consideration of relevant portions of your naval record and your application, the Board for Correction of Naval Records (Board) found the evidence submitted insufficient to establish the existence of probable material error or injustice. Consequently, your application has been denied.

Although you did not file your application in a timely manner, the statute of limitation was waived in accordance with the 25 August 2017 guidance from the Office of the Under Secretary of Defense for Personnel and Readiness (Kurta Memo). A three-member panel of the Board, sitting in executive session, considered your application on 1 November 2023. The names and votes of the panel members will be furnished upon request. Your allegations of error and injustice were reviewed in accordance with administrative regulations and procedures applicable to the proceedings of the Board. Documentary material considered by the Board consisted of your application together with all material submitted in support thereof, relevant portions of your naval record, applicable statutes, regulations, and policies, to include the Kurta Memo, the 3 September 2014 guidance from the Secretary of Defense regarding discharge upgrade requests by Veterans claiming post-traumatic stress disorder (PTSD)/mental health condition (MHC) (Hagel Memo), and the 25 July 2018 guidance from the Under Secretary of Defense for Personnel and Readiness regarding equity, injustice, or clemency determinations (Wilkie Memo). In addition, the Board considered an advisory opinion (AO) from a qualified mental health professional. Although you were provided an opportunity to respond to the AO, you chose not to do so.

The Board determined that your personal appearance, with or without counsel, would not materially add to their understanding of the issues involved. Therefore, the Board determined that a personal appearance was not necessary and considered your case based on the evidence of record.

You enlisted in the U.S. Marine Corps and entered active duty on 27 June 1984. Upon entry onto active duty, you were granted a waiver for your drug abuse, burglary, and theft while in the Delayed Entry Program.

On 5 August 2004, you received non-judicial punishment (NJP), for three-days unauthorized absence (UA). Subsequently, you received two additional NJPs, for failure to go to your appointed place of duty and for dereliction of duty by failing to thoroughly inspect a vehicle. In December 1985, you were found guilty at summary court-martial (SCM) for failure to go to your appointed place of duty, breaking restriction, and wrongful use of a controlled substance. As a result, the Commanding Officer (CO) made his recommendation to the Separation Authority (SA) that you be discharged with an Other Than Honorable (OTH) characterization. The SA accepted the recommendation and directed you be discharged for drug abuse. You were so discharged on 28 February 1986.

The Board carefully considered all potentially mitigating factors to determine whether the interests of justice warrant relief in your case in accordance with the Kurta, Hagel, and Wilkie Memos. These included, but were not limited to, your desire for a discharge upgrade and contentions that you entered the service with severe PTSD/Mental Health concerns and, due to your mental health issues, you have struggled on and off with homelessness and are currently in danger of again becoming homeless. For purposes of clemency and equity consideration, the Board noted you did not provide supporting documentation describing post-service accomplishments or advocacy letters.

As part of the Board review process, the BCNR Physician Advisor who is a licensed clinical psychologist (Ph.D.), reviewed your contentions and the available records and issued an AO dated 19 September 2023. The Ph.D. stated in pertinent part:

There is no evidence that he was diagnosed with a mental health condition in military service, or that he exhibited any psychological symptoms or behavioral changes indicative of a diagnosable mental health condition. Throughout his disciplinary processing, there were no concerns raised of a mental health condition that would have warranted a referral for evaluation. Post-service, he has received diagnoses of PTSD and other mental health concerns that are temporally remote to military service and appear unrelated. Unfortunately, available records are not sufficiently detailed to establish clinical symptoms in service or provide a nexus with his misconduct. Additional records (e.g., post-service mental health records describing the Petitioner's diagnosis, symptoms, and their specific link to his misconduct) may aid in rendering an alternate opinion.

The Ph.D. concluded, "it is my clinical opinion there is insufficient evidence of a diagnosis of PTSD or another mental health condition that may be attributed to military service. There is insufficient evidence to attribute his misconduct to PTSD or another mental health condition."

After thorough review, the Board concluded these potentially mitigating factors were insufficient to warrant relief. Specifically, the Board determined that your misconduct, as evidenced by your NJPs and SCM, outweighed these mitigating factors. In making this finding, the Board

considered the seriousness of your misconduct and the fact it included a drug offense. The Board determined that illegal drug use by a service member is contrary to military core values and policy, renders such members unfit for duty, and poses an unnecessary risk to the safety of their fellow service members. Further, the Board concurred with the AO and determined there is insufficient evidence to attribute all of your misconduct to PTSD or another mental health condition. As explained in the AO, unfortunately, available records are not sufficiently detailed to establish clinical symptoms in service or provide a nexus with your misconduct. Finally, the Board concluded that your discharge was proper and equitable under standards of law and discipline and that the discharge accurately reflects your conduct during your period of service, which was terminated by your separation with an OTH. As a result, the Board concluded your conduct constituted a significant departure from that expected of a service member and continues to warrant an OTH characterization. Even in light of the Kurta, Hagel, and Wilkie Memos and reviewing the record liberally and holistically, the Board did not find evidence of an error or injustice that warrants granting you the relief you requested or granting relief as a matter of clemency or equity. Accordingly, given the totality of the circumstances, the Board determined that your request does not merit relief.

You are entitled to have the Board reconsider its decision upon submission of new matters, which will require you to complete and submit a new DD Form 149. New matters are those not previously presented to or considered by the Board. In this regard, it is important to keep in mind that a presumption of regularity attaches to all official records. Consequently, when applying for a correction of an official naval record, the burden is on the applicant to demonstrate the existence of probable material error or injustice.

Sincerely,

11/8/2023
