Dear ██████████

This is in reference to your application for correction of your naval record pursuant to Section 1552 of Title 10, United States Code. After careful and conscientious consideration of relevant portions of your naval record and your application, the Board for Correction of Naval Records (Board) found the evidence submitted insufficient to establish the existence of probable material error or injustice. Consequently, your application has been denied.

A three-member panel of the Board, sitting in executive session, considered your application on 6 May 2025. The names and votes of the members of the panel will be furnished upon request. Your allegations of error and injustice were reviewed in accordance with administrative regulations, and procedures applicable to the proceedings of this Board. Documentary material considered by the Board consisted of your application, together with all material submitted in support thereof, relevant portions of your naval record, and applicable statutes, regulations, and policies, as well as the 14 January 2025 decision furnished by the Marine Corps Performance Evaluation Review Board (PERB), and 28 December 2024 advisory opinion (AO) provided to the PERB by the Manpower Management Division Records and Performance Branch. The AO was provided to you on 14 January 2025, and you were given 30 days in which to submit a response. Although you were afforded an opportunity to submit a rebuttal, you did not do so.

The Board carefully considered your request to modify the fitness report for the reporting period 1 May 2023 to 31 January 2024 by increasing all attribute marks. The Board considered your contention that the corrections are required to accurately reflect your performance during the observed period.

The Board, however, substantially concurred with the PERB's decision that you did not demonstrate probable material error, substantive inaccuracy, or injustice warranting modification of your fitness report. The Board determined that your fitness report is valid as written and filed in accordance with the applicable Marine Corps Performance Evaluation System (PES) Manual. The Board noted the correspondence from your former Reporting Senior (RS) asserting that the corrections are required because of administrative errors on his part; the Board, however, was not persuaded by his statement. In this regard, the Board determined that the negative impact on the other officers in the RS's profile outweighs any potential benefit to your record. The Board also

determined that a substantive correction should be based on facts about the Marine that were unknown when the original report was prepared. In this case, the Board found no evidence of factual information not known by the RS at the time of report processing that would warrant substantive changes. The Board thus concluded there is no probable material error, substantive inaccuracy, or injustice warranting corrective action. Accordingly, given the totality of the circumstances, the Board determined that your request does not merit relief.

You are entitled to have the Board reconsider its decision upon submission of new matters, which will require you to complete and submit a new DD Form 149. New matters are those not previously presented to or considered by the Board. In this regard, it is important to keep in mind that a presumption of regularity attaches to all official records. Consequently, when applying for a correction of an official naval record, the burden is on the applicant to demonstrate the existence of probable material error or injustice.

Sincerely,

5/19/2025
