█
█
Dear Petitioner:

This is in reference to your application for correction of your naval record pursuant to Section 1552 of Title 10, United States Code. After careful and conscientious consideration of relevant portions of your naval record and your application, the Board for Correction of Naval Records (Board) found the evidence submitted insufficient to establish the existence of probable material error or injustice. Consequently, your application has been denied.

A three-member panel of the Board, sitting in executive session, considered your application on 27 May 2025. The names and votes of the members of the panel will be furnished upon request. Your allegations of error and injustice were reviewed in accordance with administrative regulations, and procedures applicable to the proceedings of this Board. Documentary material considered by the Board consisted of your application, together with all material submitted in support thereof, relevant portions of your naval record, and applicable statutes, regulations, and policies. The Board also considered the 19 December 2024 decision furnished by the Marine Corps Performance Evaluation Review Board (PERB) and 31 October 2024 advisory opinion (AO) provided to the PERB by the Manpower Management Division Records and Performance Branch. The AO was provided to you on 19 December 2024 and you were given 30 days in which to submit a response. Although you were afforded an opportunity to submit a rebuttal, you chose not to do so.

The Board carefully considered your request to remove the fitness report for the reporting period 2 December 2022 to 30 June 2023. If removal is untenable, you requested to modify the report with the appropriate marks or change the Reporting Senior's (RS's) observation to not observed. The Board considered your contention that the fitness report does not reflect your performance or behavior during the reporting period as outlined in the correspondence from your RS.

The Board, however, substantially concurred with the PERB's decision that you did not demonstrate probable material error, substantive inaccuracy, or injustice warranting removal of your fitness report. The Board determined that your fitness report is valid, as modified, in accordance with the applicable Marine Corps Performance Evaluation System (PES) Manual. In this regard, the Board noted that the PERB approved corrections to your record by increasing your attributes mark according to your RS's request. The Board also determined that the balance

of your fitness report is valid; therefore, removal of your fitness report is excessive and unwarranted. The Board thus concluded that there is no probable material error, substantive inaccuracy, or injustice warranting additional corrective action. Accordingly, given the totality of the circumstances, the Board determined that your request does not merit relief.

You are entitled to have the Board reconsider its decision upon submission of new matters, which will require you to complete and submit a new DD Form 149. New matters are those not previously presented to or considered by the Board. In this regard, it is important to keep in mind that a presumption of regularity attaches to all official records. Consequently, when applying for a correction of an official naval record, the burden is on the applicant to demonstrate the existence of probable material error or injustice.

Sincerely,

6/5/2025
