Dear Petitioner:

This is in reference to your application for correction of your naval record pursuant to Section 1552 of Title 10, United States Code. After careful and conscientious consideration of relevant portions of your naval record and your application, the Board for Correction of Naval Records (Board) found the evidence submitted insufficient to establish the existence of probable material error or injustice. Consequently, your application has been denied.

Because your application was submitted with new evidence not previously considered, the Board found it in the interests of justice to review your application. A three-member panel of the Board, sitting in executive session on 8 May 2025, has carefully examined your current request. The names and votes of the members of the panel will be furnished upon request. Your allegations of error and injustice were reviewed in accordance with administrative regulations and procedures applicable to the proceedings of this Board. Documentary material considered by the Board consisted of your application, together with all material submitted in support thereof, relevant portions of your naval record and applicable statutes, regulations and policies.

You previously applied to this Board for a disability discharge and were denied on several occasions. The summary of your service remains substantially unchanged from that addressed in the Board's previous decisions.

The Board noted your previous requests, Docket Nos. 9564-18, 9893-23, and 4804-24, requested the same relief as your current submission. Due to the new evidence¹ submitted with your current request for relief, the Board considered your request for medical discharge. However, the Board determined the new evidence did not overcome the decision of the previous boards. Specifically, the Board again determined there was insufficient evidence that you were unfit for continued naval service due to a qualifying disability condition at the time of your discharge from the Marine Corps. As fully discussed in the previous decision documents, your performance and physical fitness scores did not indicate any deficiencies.

¹ You submitted several pages of post-service medical records containing highlighted items and a new statement regarding your recently diagnosed vestibular migraines.

Therefore, the Board concurred with its previous findings that no error or injustice exists with your naval records. Accordingly, given the totality of the circumstances, the Board determined that your request does not merit relief.

You are entitled to have the Board reconsider its decision upon submission of new matters, which will require you to complete and submit a new DD Form 149. New matters are those not previously presented to or considered by the Board. In this regard, it is important to keep in mind that a presumption of regularity is attached to all official records. Consequently, when applying for a correction of an official naval record, the burden is on the applicant to demonstrate the existence of probable material error or injustice.

Sincerely,

5/21/2025
